REMARKS

The foregoing amendments are being made to provide separate sequences for Okt3vl and Okt3vh in Figures 3 and 4, respectively. Although these sequences are contained within SEQ ID NOs: 5 and 7, respectively, they are presented as separate sequences in Figures 3 and 4. Pursuant to 37 C.F.R. § 1.821(c), the Sequence Listing has been revised to include these sequences as separate sequences -- SEQ ID NOs: 29 and 30, respectively. The specification has been amended accordingly. Since the sequences are completely contained within SEQ ID NOs: 5 and 7, they do not represent new matter. The specification has also been amended to include a reference to SEQ ID NO:9 whenever SEQ ID NO:8 is referenced.

Informal corrections to Figures 1 through 6 are also submitted herewith. The figures have been amended to include the SEQ ID NOs, and to reference subparts correctly. The specification has been amended to correctly refer to the drawing subparts. Figure 1b has been amended herein to correct two instances of an improper single-letter amino acid code as a result of typographical errors: two "Os" appeared in the first 10 amino acids of Figure 1b instead of two "Qs". The "Os" have been changed to "Qs". The typographical error is apparent from the corresponding codons in Figure 1a which are "CAA" and "CAG", both
